

be made payable to: *National Park Services*. A certification decision will not be issued on an application until the appropriate remittance is received. Fees are nonrefundable.

(c) The fee for review of proposed or ongoing rehabilitation projects for projects over \$20,000 is \$250. The fees for review of completed rehabilitation projects are based on the dollar amount of the costs attributed solely to the rehabilitation of the certified historic structure as provided by the owner in the Historic Preservation Certification Application, Request for Certification of Completed Work (NPS Form 10-168c), as follows:

Fee	Size of rehabilitation
\$500	\$20,000 to \$99,999
\$800	\$100,000 to \$499,999
\$1,500	\$500,000 to \$999,999
\$2,500	\$1,000,000 or more

If review of a proposed or ongoing rehabilitation project had been undertaken by the Secretary prior to submission of Request for Certification of Completed Work, the initial fee of \$250 will be deducted from these fees. No fee will be charged for rehabilitations under \$20,000.

(d) In general, each rehabilitation of a separate certified historic structure will be considered a separate project for purposes of computing the size of the fee.

(1) In the case of a rehabilitation project which includes more than one certified historic structure where the structures are judged by the Secretary to have been functionally related historically to serve an overall purpose, the fee for preliminary review is \$250 and the fee for final review is computed on the basis of the total rehabilitation costs.

(2) In the case of multiple building projects where there is no historic functional relationship among the structures and which are under the same ownership; are located in the same historic district; are adjacent or contiguous; are of the same architectural type (*e.g.*, rowhouses, loft buildings, commercial buildings); and are submitted by the owner for review at the same time, the fee for preliminary review is \$250 per structure to a maximum of \$2,500 and the fee for final re-

view is computed on the basis of the total rehabilitation costs of the entire multiple building project to a maximum of \$2,500. If the \$2,500 maximum fee was paid at the time of review of the proposed or ongoing rehabilitation project, no further fee will be charged for review of a Request for Certification of Completed Work.

PART 68—THE SECRETARY OF THE INTERIOR'S STANDARDS FOR THE TREATMENT OF HISTORIC PROPERTIES

Sec.

68.1 Intent.

68.2 Definitions.

68.3 Standards.

AUTHORITY: The National Historic Preservation Act of 1966, as amended (16 U.S.C. 470 *et seq.*); sec. 2124 of the Tax Reform Act of 1976, 90 Stat. 1918; EO 11593, 3 CFR part 75 (1971); sec. 2 of Reorganization Plan No. 3 of 1950 (64 Stat. 1262).

SOURCE: 60 FR 35843, July 12, 1995, unless otherwise noted.

§ 68.1 Intent.

The intent of this part is to set forth standards for the treatment of historic properties containing standards for preservation, rehabilitation, restoration and reconstruction. These standards apply to all proposed grant-in-aid development projects assisted through the National Historic Preservation Fund. 36 CFR part 67 focuses on "certified historic structures" as defined by the IRS Code of 1986. Those regulations are used in the Preservation Tax Incentives Program. 36 CFR part 67 should continue to be used when property owners are seeking certification for Federal tax benefits.

§ 68.2 Definitions.

The standards for the treatment of historic properties will be used by the National Park Service and State historic preservation officers and their staff members in planning, undertaking and supervising grant-assisted projects for preservation, rehabilitation, restoration and reconstruction. For the purposes of this part:

(a) *Preservation* means the act or process of applying measures necessary to sustain the existing form, integrity

and materials of an historic property. Work, including preliminary measures to protect and stabilize the property, generally focuses upon the ongoing maintenance and repair of historic materials and features rather than extensive replacement and new construction. New exterior additions are not within the scope of this treatment; however, the limited and sensitive upgrading of mechanical, electrical and plumbing systems and other code-required work to make properties functional is appropriate within a preservation project.

(b) *Rehabilitation* means the act or process of making possible an efficient compatible use for a property through repair, alterations and additions while preserving those portions or features that convey its historical, cultural or architectural values.

(c) *Restoration* means the act or process of accurately depicting the form, features and character of a property as it appeared at a particular period of time by means of the removal of features from other periods in its history and reconstruction of missing features from the restoration period. The limited and sensitive upgrading of mechanical, electrical and plumbing systems and other code-required work to make properties functional is appropriate within a restoration project.

(d) *Reconstruction* means the act or process of depicting, by means of new construction, the form, features and detailing of a non-surviving site, landscape, building, structure or object for the purpose of replicating its appearance at a specific period of time and in its historic location.

§ 68.3 Standards.

One set of standards—preservation, rehabilitation, restoration or reconstruction—will apply to a property undergoing treatment, depending upon the property's significance, existing physical condition, the extent of documentation available and interpretive goals, when applicable. The standards will be applied taking into consideration the economic and technical feasibility of each project.

(a) *Preservation*. (1) A property will be used as it was historically, or be given a new use that maximizes the retention of distinctive materials, features,

spaces and spatial relationships. Where a treatment and use have not been identified, a property will be protected and, if necessary, stabilized until additional work may be undertaken.

(2) The historic character of a property will be retained and preserved. The replacement of intact or repairable historic materials or alteration of features, spaces and spatial relationships that characterize a property will be avoided.

(3) Each property will be recognized as a physical record of its time, place and use. Work needed to stabilize, consolidate and conserve existing historic materials and features will be physically and visually compatible, identifiable upon close inspection and properly documented for future research.

(4) Changes to a property that have acquired historic significance in their own right will be retained and preserved.

(5) Distinctive materials, features, finishes and construction techniques or examples of craftsmanship that characterize a property will be preserved.

(6) The existing condition of historic features will be evaluated to determine the appropriate level of intervention needed. Where the severity of deterioration requires repair or limited replacement of a distinctive feature, the new material will match the old in composition, design, color and texture.

(7) Chemical or physical treatments, if appropriate, will be undertaken using the gentlest means possible. Treatments that cause damage to historic materials will not be used.

(8) Archeological resources will be protected and preserved in place. If such resources must be disturbed, mitigation measures will be undertaken.

(b) *Rehabilitation*. (1) A property will be used as it was historically or be given a new use that requires minimal change to its distinctive materials, features, spaces and spatial relationships.

(2) The historic character of a property will be retained and preserved. The removal of distinctive materials or alteration of features, spaces and spatial relationships that characterize a property will be avoided.

(3) Each property will be recognized as a physical record of its time, place and use. Changes that create a false

sense of historical development, such as adding conjectural features or elements from other historic properties, will not be undertaken.

(4) Changes to a property that have acquired historic significance in their own right will be retained and preserved.

(5) Distinctive materials, features, finishes and construction techniques or examples of craftsmanship that characterize a property will be preserved.

(6) Deteriorated historic features will be repaired rather than replaced. Where the severity of deterioration requires replacement of a distinctive feature, the new feature will match the old in design, color, texture and, where possible, materials. Replacement of missing features will be substantiated by documentary and physical evidence.

(7) Chemical or physical treatments, if appropriate, will be undertaken using the gentlest means possible. Treatments that cause damage to historic materials will not be used.

(8) Archeological resources will be protected and preserved in place. If such resources must be disturbed, mitigation measures will be undertaken.

(9) New additions, exterior alterations or related new construction will not destroy historic materials, features and spatial relationships that characterize the property. The new work will be differentiated from the old and will be compatible with the historic materials, features, size, scale and proportion, and massing to protect the integrity of the property and its environment.

(10) New additions and adjacent or related new construction will be undertaken in such a manner that, if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.

(c) *Restoration.* (1) A property will be used as it was historically or be given a new use that interprets the property and its restoration period.

(2) Materials and features from the restoration period will be retained and preserved. The removal of materials or alteration of features, spaces and spatial relationships that characterize the period will not be undertaken.

(3) Each property will be recognized as a physical record of its time, place and use. Work needed to stabilize, consolidate and conserve materials and features from the restoration period will be physically and visually compatible, identifiable upon close inspection and properly documented for future research.

(4) Materials, features, spaces and finishes that characterize other historical periods will be documented prior to their alteration or removal.

(5) Distinctive materials, features, finishes and construction techniques or examples of craftsmanship that characterize the restoration period will be preserved.

(6) Deteriorated features from the restoration period will be repaired rather than replaced. Where the severity of deterioration requires replacement of a distinctive feature, the new feature will match the old in design, color, texture and, where possible, materials.

(7) Replacement of missing features from the restoration period will be substantiated by documentary and physical evidence. A false sense of history will not be created by adding conjectural features, features from other properties, or by combining features that never existed together historically.

(8) Chemical or physical treatments, if appropriate, will be undertaken using the gentlest means possible. Treatments that cause damage to historic materials will not be used.

(9) Archeological resources affected by a project will be protected and preserved in place. If such resources must be disturbed, mitigation measures will be undertaken.

(10) Designs that were never executed historically will not be constructed.

(d) *Reconstruction.* (1) Reconstruction will be used to depict vanished or non-surviving portions of a property when documentary and physical evidence is available to permit accurate reconstruction with minimal conjecture and such reconstruction is essential to the public understanding of the property.

(2) Reconstruction of a landscape, building, structure or object in its historic location will be preceded by a thorough archeological investigation

National Park Service, Interior

§ 71.3

to identify and evaluate those features and artifacts that are essential to an accurate reconstruction. If such resources must be disturbed, mitigation measures will be undertaken.

(3) Reconstruction will include measures to preserve any remaining historic materials, features, and spatial relationships.

(4) Reconstruction will be based on the accurate duplication of historic features and elements substantiated by documentary or physical evidence rather than on conjectural designs or the availability of different features from other historic properties. A reconstructed property will re-create the appearance of the non-surviving historic property in materials, design, color and texture.

(5) A reconstruction will be clearly identified as a contemporary re-creation.

(6) Designs that were never executed historically will not be constructed.

PART 71—RECREATION FEES

Sec.

- 71.1 Application.
- 71.2 Types of Federal recreation fees.
- 71.3 Designation.
- 71.4 Posting.
- 71.5 Golden Eagle Passport.
- 71.6 Golden Age Passport.
- 71.7 Entrance fees for single-visit permits.
- 71.8 Validation and display of entrance permits.
- 71.9 Establishment of recreation use fees.
- 71.10 Special recreation permits and special recreation permit fees.
- 71.11 Collection of Federal recreation fees.
- 71.12 Enforcement.
- 71.13 Exceptions, exclusions, and exemptions.
- 71.14 Public notification.
- 71.15 The Golden Eagle Insignia.

AUTHORITY: Sec. 4, Land and Water Conservation Fund Act of 1965 (16 U.S.C.A. 4601-6a (Supp., 1974)), as amended by Pub. L. 93-303; and sec. 3, Act of July 11, 1972, 86 Stat. 461; sec. 2 of Reorganization Plan No. 3 of 1950 (64 Stat. 1262).

SOURCE: 39 FR 33217, Sept. 16, 1974. Redesignated at 44 FR 7143, Feb. 6, 1979, and 46 FR 34329, July 1, 1981; correctly redesignated at 46 FR 43045, Aug. 26, 1981, unless otherwise noted.

§ 71.1 Application.

This part is promulgated pursuant to section 4, Land and Water Conservation Fund Act of 1965, 16 U.S.C.A. 4601-6a (Supp., 1974), and section 3, Act of July 11, 1972, 86 Stat. 461. Any Federal recreation fee charged by any bureau of the Department of the Interior shall be charged according to criteria set forth in this part.

§ 71.2 Types of Federal recreation fees.

There shall be three types of Federal recreation fees:

(a) Entrance fees, charged either on an annual or single-visit basis, for admission to any Designated Entrance Fee Area;

(b) Daily recreation use fees for the use of specialized sites, facilities, equipment or services furnished at Federal expense; and

(c) Special recreation permit fees for specialized recreation uses, such as, but not limited to, group activities, recreation events, and the use of motorized recreation vehicles.

§ 71.3 Designation.

(a) An area or closely related group of areas shall be designated as an area at which entrance fees shall be charged (hereinafter "Designated Entrance Fee Area") if the following conditions are found to exist concurrently:

(1) The area is a unit of the National Park System administered by the Department of the Interior;

(2) The area is administered primarily for scenic, scientific, historical, cultural, or recreation purposes;

(3) The area has recreation facilities or services provided at Federal expense; and

(4) The nature of the area is such that entrance fee collection is administratively and economically practical.

(b) Any specialized site, facility, equipment or service related to outdoor recreation (hereinafter "facility") shall be designated as a facility for which a recreation use fee shall be charged (hereinafter "Designated Recreation Use Facility") if:

(1) For each Designated Recreation Use Facility, at least one of the following criteria is satisfied:

(i) A substantial Federal investment has been made in the facility,
